ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): The 55-acre site consists entirely of an agricultural field. There is no evidence of any ditches, streams or other surface water tributaries on the site. The only wetland identified in a wetland delineation report and subsequent field visits is a depression basin about 5,100 square feet in size. It is unlikely that this basin would have any potential for use in an interstate commercial operation.
